

Shorten LinkedIn URL

Here are the instructions on how to use your LinkedIn's own short link. When on your profile page, just right of the "Edit" button there is a drop-down arrow. When dropped down, one can select "Share profile". This function generates a standard message that can be shared on facebook and twitter. In the standard message the short link for ones public profile is shown as <http://lnkd.in/LETTERS>.

This can then be copy-pasted into ones resumé etc.
